

## A Demo for figure-table side by side

the package `capt-of` with `\usepackage{capt-of}` in the latex preamble is needed! This package allows different types of captions in a float environment.

Table/figure or table/table side by side needs minipages. So there are some different solutions which all produce the same.

### Figure/Table side by side in a TABLE-float environment:

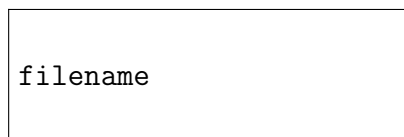

x	y
rr	t
rrrrr	g
