

## Description environment

Only for demonstration all Labels are boxed.

### Bottom aligned label

previous paragraph with some nonsense text for the demonstration of list environments.

**This is a very long and over more than one line long, a so called multiline label** and now comes some text for this description environment, which is still nonsense, too.

**Next** This is again a line, but not so long than the forgoing line from the multiline example.

```
\begin{description}
\item [\fbox{{\parbox[b]{.5\linewidth}{This is a very long and
over more than one line long, a so called multiline label}}}]
and now comes some text for this description environment,
which is still nonsense, too.
\item [\fbox{Next}] This is again a line, but not so long
than the forgoing line from the multiline example.
\end{description}
```

Next paragraph with some nonsense text for the demonstration of list environments.

### Top aligned label

**This is a very long and over more than one line long, a so called multiline label** and now comes some text for this description environment, which is still nonsense, too.

**Next** This is again a line, but not so long than the forgoing line from the multiline example.

```

\item [\fbox{{\parbox[t]{.5\linewidth}{This is a very long and over more than one
line long, a so called multiline label}}}]
and now comes some text for this description environment, which is still nonsense
\item [\fbox{Next}] This is again a line, but not so long than the forgoing line
multiline example.

```

Next paragraph with some nonsense text for the demonstration of list environments.

### Centerd label

```

This is a very long and over more than one line long, a so called multiline label and now comes some text for this description environment, which is still nonsense, too.

```

```

Next This is again a line, but not so long than the forgoing line from the multiline example.

```

```

\begin{description}
\item [\fbox{{\parbox{.5\linewidth}{This is a very long and over more than one
line long, a so called multiline label}}}]
and now comes some text for this description environment, which is still nonsense
\item [\fbox{Next}] This is again a line, but not so long than the forgoing line
multiline example.
\end{description}

```

Next paragraph with some nonsense text for the demonstration of list environments.
